Appropriate engineering controls	conditions. If applicable, use process	air changes per hour) should be used. Ventilation rates should be matched to enclosures, local exhaust ventilation, or other engineering controls to maintain exposure limits. If exposure limits have not been established, maintain airborne eyewash station.
Individual protection measures, s	such as personal protective equipment	
Eye/face protection	If use of product risks exposure to cor	ntact, wear safety glasses with side shields.
Skin protection		
Hand protection	Impervious gloves are recommended	for prolonged use.
Other	If use of product risk exposure to cont	tact, wear suitable protective clothing.
Respiratory protection	In case of insufficient ventilation, wea	ar suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective	clothing, when necessary.
General hygiene considerations		e measures, such as washing after handling the material and before eating, drinking, < clothing and protective equipment to remove contaminants.
